

Increase customer value with State of the art Water technologies and services.

The Building and Construction Industry of today needs comprehensive, cost-effective and reliable water treatment systems and services. Also important is the regulatory compliance, as awareness on Water and its importance is increasing at all levels.

Aquatechnics is one of the most competent Technology provider here, delivering our projects with Superior designs, Quality equipments and Cost-effective operation.

Water & Wastewater Treatment Solutions
For the Commercial Sector

The Indian Scenario

Water shortages are glaringly obvious in India. The storm of rapid urbanization, rising population, increasing consumption of energy and water, and warming weather reassures the fact that what we wasted yesterday is the most precious resource for tomorrow.

India cannot afford to wait any longer for the adoption of modern and innovative water technologies.

What we do

With our engineering expertise, design and delivery capabilities we deliver plants of almost all capacities and technologies that are customized to cater the specific needs of buildings like hotels, hospitals, shopping malls, IT parks, residential and other commercial complexes.

Water Treatment Programs

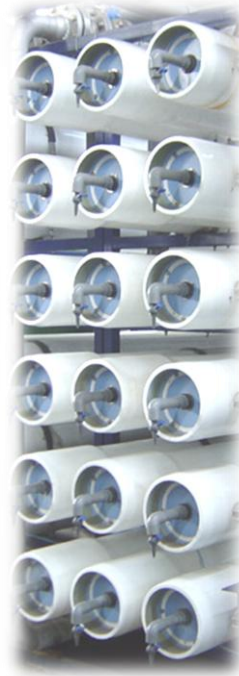

Our Capabilities

Water Treatment

- Filtration
- Softening
- Ultra filtration
- Reverse Osmosis
- Ultraviolet Sterilization
- Ozonation
- Other Disinfection Systems

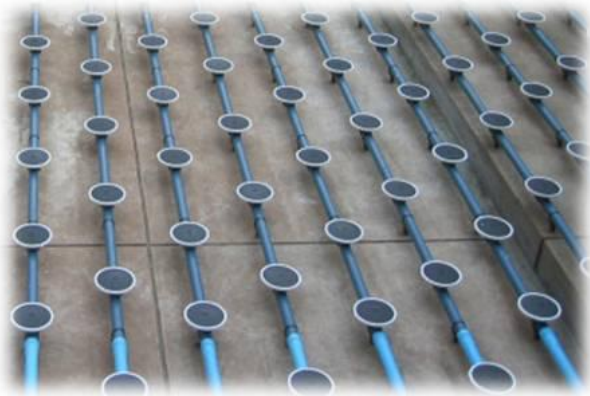

Water Management

- Hydro Pneumatic Systems
- Biofiltration
- Pond and Lake Bioremediation

Regreen

Wastewater Treatment Programs

Sewage Treatment

- Extended Aeration
- Activated Sludge Process (ASP)
- Moving Bed Bio-Reactor (MBBR)
- MBBR with Quaternary UF
- Submerged Aerobic Fixed Film Reactor (SAFF)
- Sequential Batch Reactor (SBR)
- Membrane Bio-Reactor (MBR)
