

Dependable. Innovative. Exciting.

Pools and Recreational Water Treatment from Aquatechnics.

When it comes to pools, Safety and Reliability matter the most. Contaminated water can lead to a variety of diseases particularly if the swimmer's head is submerged or the water swallowed.

The principal factors relating to the efficiency of water circulation in swimming pools are the hydraulic design of the system as well as the efficiency of Water treatment. At Aquatechnics, we design and deliver pools to the most relevant engineering standards so that the system is dependable, reliable and exciting.
